PROFESSIONAL SUMMARY

Junior System Administrator with strong hands-on experience maintaining Windows systems, configuring hardware, and supporting user environments. Skilled in managing device compliance, resolving infrastructure issues, and streamlining IT operations in dynamic environments.

EXPERIENCE

Technology Coordinator

Mar 2025 – Present

Basis Ed

Peoria, AZ

- Managed daily IT operations across campus, including Helpdesk ticketing, hardware inventory, and Office 365 Group administration.
- Administered Intune device compliance; enforced naming conventions, primary user assignments, and resolved non-compliance issues.
- Monitored system health and uptime via PRTG, ensuring proactive response to network and infrastructure alerts.
- Conducted weekly vulnerability reviews; identified and blocked newly discovered high-risk websites.
- Supported and maintained printers, projectors, student laptop carts, and tablets to ensure device availability.
- Oversaw patch management; ensured endpoint devices were current with OS updates and antivirus deployments.
- Organized and maintained server room environment to meet best practices for infrastructure reliability.

IT Operations Engineer

Apr 2024 – Jan 2025

Amazon

Tempe, AZ

- Engineered automation solutions by developing Tampermonkey scripts for browser-based tasks, streamlining cross-team operational workflows.
- Maintained and enhanced internal ticket-routing logic based on conditional rules, ensuring efficient and accurate service request handling.
- Provided technical support across end-user environments, troubleshooting hardware and software at multiple operational sites.

PROJECTS

AWS Cloud Resume Challenge

- Deployed static portfolio site using AWS S3, CloudFront, and Route 53.
- Integrated real-time visitor counter via Lambda, DynamoDB, and API Gateway.
- Implemented CI/CD automation via GitHub Actions.
- Applied IAM policies and encryption best practices to secure resources.
